

# ASTRABUDGET: PRIVACY POLICY

---

**Last Updated:** May 24, 2026

AstraCoreNova values your privacy as highly as your financial security. The AstraBudget application is built on the principles of data minimization and transparency. This document explains how we process information so you can manage your capital with peace of mind.

## 1. NO IDENTIFICATION

AstraBudget operates without account registration. We do not know your name, email address, or phone number. Your financial history is linked exclusively to your device or an anonymous technical identifier.

## 2. DATA CATEGORIES AND COLLECTION METHODS

To ensure the functionality of intelligent features, the app accesses the following data:

- **Financial Notifications (SMS and Push):** We analyze only messages containing information about fund movements (banks, payment systems, crypto wallets).
- **Minimization Principle:** The system extracts only the amount, currency, transaction type, and potential source of expense or income. We never read passwords, PIN codes, CVVs, or full card numbers.
- **Camera and Images:** Used strictly at your request to scan receipts and invoices (OCR). No other photos from your device are analyzed.
- **Technical Device Data:** Information about the phone model and OS version is collected to optimize **ClauneckAI** models and for bug fixing.

## 3. CLAUNECKAI: PROCESSING AND SECURITY

We offer multiple levels of interaction, allowing you to control your privacy level:

- **ClauneckAI Cloud (Claude 3 Haiku Model):** Data is transmitted in encrypted form (SSL/TLS) to secure servers for deep analytics. These features are also partially available to Free plan users for a limited time in exchange for viewing advertisements.

- **ClauneckAI Local (Gemma 3 2b Model):** For those who believe that "money loves silence." All processing of messages and receipts occurs exclusively on your smartphone. Your financial figures never leave the device.
- **ClauneckAI Uncensored (18+ Mode):** Data is processed similarly to the cloud or local tiers, but the AI models generate responses without applying content filters. No additional personal data is collected for this mode.
- **Transient Processing:** Data sent to the cloud is treated as transient. It is processed in real-time by the neural network to provide immediate results. We do not create persistent cloud databases of your history that could be linked to your identity. Data is not used to train general models outside of your current session.

## 4. DATA RETENTION AND DELETION

- **Local Storage:** Your entire financial history is stored in your phone's memory. Deleting the app automatically destroys all data without the possibility of recovery.
- **Cloud Processing:** Since there is no registration, we do not store your history in the cloud on a permanent basis. Data transmitted for AI analysis is deleted or anonymized after the processing session is complete, following strict technical security protocols.

## 5. THIRD-PARTY DATA TRANSFER

- **No Data Trading:** AstraCoreNova does not sell, rent, or transfer your financial or any other personal information to advertisers or brokers.
- **Google and Anthropic Services:** As the app relies on Google infrastructure (Firebase, AdMob) and Anthropic integrations, certain technical data is processed in accordance with their respective privacy policies and terms:
  - **Google Privacy Policy:** <https://policies.google.com/privacy>
  - **Google Terms of Service:** <https://policies.google.com/terms>
  - **Anthropic Privacy Policy:** <https://www.anthropic.com/legal/privacy>
  - **Anthropic Terms of Service:** <https://www.anthropic.com/legal/consumer-terms>
- **Advertising (AdMob):** The free version may display advertisements. Advertising identifiers (IDFA/AAID) may be used to show relevant ads, but they are in no way linked to your financial history in AstraBudget.

## 6. POLICY CHANGES

AstraCoreNova reserves the right to update this Policy. We will notify you of significant changes through app updates or push notifications.

## | 7. CONTACTS
